PYTHON / BACKEND ENGINEER

PROFESSIONAL SUMMARY

Innovative and results-driven Python / Backend Engineer with an HND in Artificial Intelligence Technology and 2+ years of professional experience architecting scalable backend systems, RESTful APIs, and data-driven web applications. Proven expertise in Python (Django, FastAPI) and relational databases (PostgreSQL, MySQL), with a strong foundation in backend security, object-oriented programming (OOP), and Git version control. Experienced in building custom system integrations, conducting vulnerability audits, and implementing automated workflows to deliver secure, high-performing enterprise and educational web platforms.

CORE SKILLS

- **Backend Development:** Python (Advanced), Django, FastAPI, RESTful APIs, Object-Oriented Programming (OOP), Data Structures.
- **Databases & Architecture:** PostgreSQL (Data integrity, optimization), MySQL, SQL, Database Schema Design.
- **Tools & DevOps:** Git, GitHub, Jira, CI/CD pipelines, System Integrations.
- **Security & Full-Stack (Secondary):** Laravel, Web Application Vulnerability Assessments, Code Auditing, JavaScript, Tailwind CSS.

WORK EXPERIENCE

Python / Backend Engineer

Sahel College of Health Sciences, Gusau | March 2026 – April 2026

- Engineered and deployed the complete institutional portal (<https://sahelcollegeofhealthsciencesgusau.com.ng>), improving digital administration capabilities.
- Developed secure user authentication modules and databases to manage sensitive academic, staff, and student datasets.
- Configured robust backend processes and streamlined structural navigation pipelines to enhance portal security and responsiveness.

Python / Backend Engineer

Ministry of Skills Acquisition and Entrepreneurship Development | October 2025 – January 2026

- Built Python-based reporting dashboards and ETL data workflows, reducing manual report generation by 10 hours per week while improving report accuracy for state-wide operations.
- Architected, optimized, and maintained the relational database layer, executing routine backups, indexing, and ensuring strict data integrity.
- Performed Python backend and application security reviews, identifying and remediating critical vulnerabilities to reduce system exposure to data leakage and access-control risks.

Full-Stack Software Engineer

Danaike Services | January 2026 – March 2026

- Architected and launched a fully operational food ordering, ride booking, errand services, delivery and logistics platform (<https://danaikeservices.com.ng>) encompassing a web application and mobile framework.
- Programmed the backend services utilizing the Laravel framework paired with a dynamic Blade template frontend.
- Integrated custom tracking APIs and structured the database layer to manage real-time transport, scheduling, and transaction details efficiently.

Backend Engineer (Remote)

Zannah Reporters | October 2025 – December 2025

- Built and maintained a high-traffic web platform (<https://zannahreporters.org>), implementing dynamic JavaScript-driven web forms that boosted successful user interactions by 30%.
- Developed and integrated custom modules for multilingual content distribution, scaling international user engagement by 25%.

- Maintained backend services, deployment pipelines, and SSL automation for a high-traffic platform, sustaining 99.9% uptime and uninterrupted service delivery.

Backend Engineer (Remote)

Civil Alliance for Climate Protection and Education (CACPE) | February 2025 – February 2026

- Designed and implemented reusable HTML/CSS/JS templates and modular backend components (<https://cacpeafrica.org>), speeding up overall content deployment pipelines.
- Developed RESTful API integrations between the platform and third-party CRM/analytics tools, improving data flow reliability and reporting visibility across the backend application.
- Optimized system performance by rewriting inefficient backend routines and media handling workflows, reducing server storage requirements by 20%.

Cyber Security & Digital Forensics Intern (Remote)

Prodigy InfoTech & Cyber Secured India | September 2024 – August 2025

- Conducted deep-dive vulnerability assessments on enterprise web applications using network mapping and vulnerability scanning frameworks.
- Built custom Python-based security scripts, network tools, and local encryption scripts to automate routine application testing tasks.
- Analyzed complex application and server logs to trace data anomalies, isolate potential threat vectors, and resolve internal system flaws.

KEY PROJECTS

- **AI Speech-to-Text Transcription System** | *Python, FastAPI, JavaScript, Tailwind CSS* |
Github: https://github.com/Godwin015/speech_to_text_transcription
Huggingface: https://huggingface.co/spaces/Gaadwhin/speech_to_text_api.
 - Developed an end-to-end audio transcription platform integrating the Hugging Face Whisper machine learning model locally via a high-performance FastAPI backend.
 - Engineered asynchronous data-stream processing to handle large audio file chunking efficiently, minimizing request timeouts and optimizing server memory management.
 - Designed a responsive frontend to manage real-time browser audio recording inputs and handle asynchronous backend responses smoothly.
- **Secure School Payment Portal** | *Python, Django, PostgreSQL, QR Architecture*
Github: https://github.com/Godwin015/school_portal
 - Designed and implemented a complete institutional payment solution utilizing custom Python and Django backend logic to ensure safe financial transactional workflows.
 - Optimized the database layer with relational PostgreSQL schema indexing to maintain precise ledger histories and prevent concurrency issues during peak traffic.
 - Built an automated verification system that embeds encrypted transaction hash details into dynamic QR codes for instant offline receipt validation.

EDUCATION

- **Higher National Diploma (HND) in Artificial Intelligence Technology**
- *Abdu Gusau Polytechnic, Talata Mafara, Zamfara State, Nigeria* | June 2025
- **National Diploma (ND) in Computer Science**
- *Abdu Gusau Polytechnic, Talata Mafara, Zamfara State, Nigeria* | September 2022

CERTIFICATIONS

- Certificate of Completion of Internship (Web Application Vulnerability Auditing) - Prodigy InfoTech
- Certificate of Completion of Internship (Software Application Security & Digital Forensics) - Cyber Secured India
- Blockchain Technology Certification – BSV Academy / NITDA
